

# Cequence | Redwood Posts | Capping

## & Top Of Wall Redwood Posts

### PRODUCT DATA SHEET

## About The Products

Our Redwood posts are made from high-quality pressure treated Scandinavian Redwood. **They can be used with our Redwood & Cedar fencing.**

### Profiled Top Posts

**Profiled top posts are a part of our 3 part Cequence fencing system.** They are to be used in conjunction with our Cequence fence panels and Cequence capping rails to create a seamless slatted fence.

### Flat Top Posts

Flat top posts are an option if capping is not needed. They are also perfect for gates and corner posts.

### Capping Rails

Capping rails finish the top of your fence perfectly. They provide protection to the top of the post and panel and create a strong top line thats pleasing to the eye. **Make sure you are using profiled posts if you wish to have capping rails.**

# Cequence | Redwood Posts | Capping & Top Of Wall Redwood Posts

## PRODUCT DATA SHEET

### More about our Posts and Capping

The Cequence fencing system comprises of 3 parts - A Cequence capping rail, a Cequence profiled top fence post and a Cequence fence panel. It's also possible to use our slatted panels without capping in which case use flat top posts.

With the option of fitting posts into the ground or on top of walls, our range of posts offers complete versatility

All our in ground posts come with a post saver sleeve that protects the post from rotting. This offers a fantastic 20 year guarantee against rotting in ground.

With our top of wall posts you can easily fix our Cequence fencing neatly to the top of a wall. The posts have a 20mm bar that protrudes from the bottom of the post, this gets fixed into the wall. Simply drill a 28mm hole with a masonry drill or Core bit. Then you can chemical fix the posts into place with a 2 part resin anchor glue.
